Sheet Metal Spin - Ins

MODULAR METAL FABRICATORS INC.

Low pressure sheet metal fittings used for round take offs from rectangular ducts. A fast positive installation that is available in a wide range of types and sizes.

Extractor is factory installed. Damper is spring loaded with retractable bearing and locking regulator. Construction is prime galvanized steel. All fittings are Union made and labeled. Fiberglass guard available on request.

We do not recommend that holes be cut in duct until you have your Spin-ins, or call MMF, inc. for hole size. Call for sizes and gauges not shown.
